

# Alizabeth Aramowicz Smith

## Senior Consultant

### EXPERIENCE SUMMARY

Alizabeth Aramowicz Smith has more than 25+ years of experience with global technology companies, warehouse/distribution centers, retail, research and development laboratories, chemical manufacturers, transportation parts suppliers, life science corporations, garment manufacturers, the paper industry, and colleges and universities.

She specializes in global environmental, health, and safety (EHS) compliance management systems development; EHS policy analysis; audits/inspections and results trend analysis; EHS training development and presentation; and management and coordination of all aspects of EHS compliance projects. She is known for innovative thinking on how clients can be successful in achieving their EHS goals.

Alizabeth excels at leading and motivating diverse teams of professionals, as well as communicating/liasing with clients (government and industry), consulting firms, and the public. She is skilled at identifying and developing strategies and operations plans to identify, visualize and reduce EHS risks for companies. Alizabeth is an active leader within Antea Group, including leading the [Health and Safety Practice](#) and the company's [Global Operations Support](#), which includes the [Global RegSupport Helpdesk](#). Finally, she serves on the company's Technology Segment and consumer and Industrial Goods Segment and is a member of the Leadership Steward supporting the CEO/President of the [Inogen Environmental Alliance](#).

### RELATED PROJECTS

#### Corporate EHS Consulting

- Develops proactive EHS programs for brand name clients, tailored to company-specific risk tolerance levels. Drives implementation of programs for effective integration into company processes and culture throughout the organization.
- Supports clients in strategic EHS planning, risk management, stakeholder engagement, company messaging, and annual budgeting.
- Fosters collaborative client engagements to provide a forum to discuss EHS challenges and responses to market disruptors (e.g., COVID-19).
- Launched a global EHS Risk Ranking process and tool to assist clients in expansion efforts, where to target EHS budgets, and leading and lagging metrics to monitor the EHS culture of clients.
- Manages an international team for the implementation of the ISO 45001 system for a global distribution company.
- Created and implemented a system to collect, track and visualize 141 country-specific emergency response regulations for over 1,100 facilities (offices, data centers, electronic laboratories, warehouses, and manufacturing) to calculate the monetary value of risk the client is facing.
- Leads multiple benchmarking and industry surveys on various EHS topics to assist clients in positioning compliance programs and policies as best in class.
