Professional Experience

Sameer is a Partner at Huco Consulting, a wholly-owned subsidiary of Montrose Environmental Project. With 14+ years of project management expertise, Sameer is an all-around environmental, health, safety & IT expert. Revered as thought leader by clients and industry peers alike, Sameer has successfully completed Environment, Health and Safety & Sustainability (EHS&S) project implementations for a consortium of different industries. Throughout his career, Sameer has helped hundreds of companies manage their Environmental, Social, and Governance (ESG) & Environmental, Health and Safety (EHS) challenges using leading enterprise applications. Whether it's managing and supporting several large-scale Environmental Management Information Systems (EMIS) solutions, or developing unique solutions, Sameer not only leads off-the-shelf enterprise solutions, but he develops cloud-based point solutions. Going beyond software, he has helped clients with content, work processes, integrations, outputs and change management processes needed to sustain an information management system.

Fields of Expertise include: Business Intelligence, planning, setting up and supporting ESG & EHS solutions, helping companies track the status and performance of their organization against internal and/or external metrics, standards or goals; developing custom cloud-based applications for GHG data collection and task management; enhanced off-the-shelf solutions with custom procedures and triggers.

Education, Licenses & Certifications

Master of Business Administration., University of Southern California, Los Angeles, CA, 2007

B.Sc. Chemical Engineering, The University of Texas, Austin, TX, 2001

Relevant Project Experience

Systems Requirements Assessments & Software Selection, Multiple Clients, Multiple Industries

Sameer performed system and requirements assessments (including software selection) for Arkema Chemicals, BMC Group, BP, Canal Barge Company, Cliffs Natural Resources, Crown Point International, Energy Transfer, Hewlett Packard Enterprise, Kinder Morgan, and Tallgrass Energy.

Planning, Design & Implementation Lead, Multiple Clients, Multiple Industries

Sameer planned, developed, implemented and supported enterprise-wide systems for Arkema Chemicals (Air), BP (Air/Greenhouse Gas), DCP Midstream (Air, GHG, compliance & water), Dow (Air, Emission allowances), Dynegy (Air, Water), Eagle Rock Energy (Air/GHG), Encana (Air/GHG, compliance), Energy Transfer (Air/GHG,

Incidents), Kinder Morgan (Air/GHG, Compliance, Safety, Corporate Reporting), McWane (Air, Training), Ryder Transportation (Incidents, Inspections, Observations, Tasking & Corporate KPIs), Shell Chemical (Air, Water, Waste, Chemical Inventory, Toxic Release Inventory), Tallgrass (Air/GHG, Compliance, Inspections), Williams Energy (Compliance), United States Coast Guard (Compliance), and the United States Postal Services (Audit).

IT Integrations, Large Midstream Acquisition

Sameer managed integration efforts for a large midstream acquisition, including design, set-up & support. Supported integration of process systems like PI, ODS, LIMS, and LeakDas with Environmental Management Information Systems (EMIS) systems.

Business Intelligence, Huco Consulting & Multiple Clients

Sameer developed and supported Crystal Reports, Business Objects & SSRS for clients, including paper and electronic submission to state and federal agencies. Support Huco's BI efforts across EMIS platforms, web services and solutions like Qlik.

Product Development & Solution Design, Huco Consulting & Multiple Clients

Sameer developed custom cloud-based applications for GHG data collection and task management and enhanced off the shelf solutions with custom procedures and triggers. Leveraged off-the-shelf solutions to develop custom extensions for clients, e.g. PSM audit, engine testing notifications, tanks inspections, data loading tools, etc.

On-Site Experience, 25+ Petrochemical and Manufacturing Facilities

Sameer provided lead on-site implementation support and training for petrochemical and manufacturing facilities across North America (25+), including classroom training for over 60 people, establishing strong relationships with corporate and field staff.

Design, Data Collection & Support Lead for Emissions Inventories

Led design, implementation, data collection and support of EMIS systems for the generation of emissions inventories (Criteria and HAP pollutants), Greenhouse Gas Reporting (Subparts A, C, W, NN, PP & UU), discharge monitoring reports (DMRs), audit, incidents, inspections, and enterprise compliance reporting.

Presentations & Publications

Sameer, V. Software Selection SME, NAEM Conferences. Sameer led software selection workshops for 70+ Environmental, Health & Safety, and Sustainability (EHS&S) Management professionals, three years in a row.

Sameer, V. Training Lead, Huco Consulting & Multiple Clients Sameer has created an assortment of design protocols, training manuals and interactive training videos.
