

# EHS & SUSTAINABILITY SOFTWARE

2017 | CONFERENCE

MARCH 6-8 | HOUSTON, TX

## Welcome!

Welcome to Houston for NAEM's annual EHS & Sustainability Software and Data Management Conference!

This year we are proud to welcome more than 200 in-house leaders, software providers and implementation specialists for a robust dialogue about advancing EHS&S performance through software. As the leading provider of peer-to-peer benchmarking for EHS&S professionals, NAEM has designed this conference to meet the needs of users at various stages of the data management journey.

For those who are shopping for a system, we are proud to feature 12 peer-led software demonstrations, results from our 2017 Software Buyers Guide report, and a half-day workshop which outlines best practices for managing a selection and clearly articulating system requirements to prospective partners.

And for those users who are looking to keep up with emerging technology trends, we have added a new track this year, focused on optimizing existing systems, solving problems and leveraging data to advance EHS&S performance. We encourage you to be candid about your challenges with those you meet: You never know where your next idea will come from.

As you map out your time here with NAEM, we'd like to remind you that this is a forum for you to learn. Take the time to introduce yourself to those who are sitting next to you, exchange stories and ask questions. The exhibit hall is also a valuable resource to you, and features the leading companies who have built this industry from the ground up. Take the time to learn from their experiences, which I assure you, go far beyond the technology alone.

Thank you for joining us this year!

Sincerely,

A handwritten signature in black ink that reads "Carol Singer Neuvelt".

**Carol Singer Neuvelt**  
Executive Director, NAEM

## About NAEM

The National Association for Environmental Management (NAEM) empowers corporate leaders to advance environmental stewardship, create safe and healthy workplaces and promote global sustainability. As the largest professional community for EHS and sustainability decision-makers, we provide peer-led educational conferences, benchmarking research and an active network for sharing solutions to today's corporate EHS and sustainability management challenges. Visit NAEM online at [www.naem.org](http://www.naem.org).

## March 6

1:30 - 5:30 p.m. **Software Selection Workshop** Plaza I

Designed to meet the needs of those at the beginning of their selection process, this workshop will prepare you to make the most of your conference experience. You'll come away with a step-by-step plan you can use to manage the selection process, and to overcome potential hurdles to success. You'll also spend time articulating your organization's needs in clear language that will help you have focused conversations with potential partners on-site.

## March 7

8:00 a.m. **Registration** Galleria Foyer

8:00 - 9:00 a.m. **Breakfast** Galleria Foyer

9:00 - 9:15 a.m. **Welcome and Introductions** Bellaire, Post Oak

- **Carol Singer Neuvelt**, Executive Director; NAEM

9:15 - 10:30 a.m. **Opening Session: EHS Data Management: Today and Tomorrow** Bellaire, Post Oak

- **Peter Bussey**, Research Analyst; LNS Research
- **Vijay Gudivaka**, CEO; E2ManageTech
- **Margery A Moore**, Director EHS; Bloomberg BNA

The EHS Software market has exploded in the last few years. From almost a billion dollars invested in 18 months, double digit growth in software licenses, to innovative EHS technologies that might completely change the way compliance is managed (ie. wearable sensors to VR technologies), there is no doubt this market is hot. Join us for the opening keynote to get an inside glimpse into this market from leading experts that each bring a different perspective to this discussion.

10:45 - 11:45 a.m. **Implementing a Global EHS Compliance & Monitoring Project: Challenges, Benefits, and Keys to Success** San Felipe

- **Linda Spaulding**, Manager, U.S.; Red-On-Line

Corporate managers at headquarters want to ensure their global sites are meeting regulatory requirements, while site-level managers often see environment management systems as more work with little benefit. This session will review the challenges of ensuring compliance in different jurisdictions, the benefits and drawbacks of a single global system and the importance of site-level buy-in.

10:45 - 11:45 a.m.

## **Demonstration of regAction with BBNA by NuStar Energy LP** [Tanglewood](#)

- **Jackie Ednave**, HSE Coordinator; NuStar Energy LP

NuStar will show how it has utilized the partnership between BBNA and regAction to address the challenges that many EHS professionals face: keeping regulatory information current and applicable to all facilities and modules. The speaker will also demonstrate how to create an up-to-date auditing template and conduct the audit all within the EMIS.

## **Demonstration of Intalex Technologies Inc. by Apache Corp.** [Bellaire, Post Oak](#)

- **Laura Espinoza**, EHS&S Specialist II; Apache Corp.

Apache will demonstrate how it uses the Intalex ACTS software in conjunction with Schlumberger's AVOCET in order to improve overall reporting workflow, increase accuracy of collected data, and allow for a leaner environmental team to achieve multiple regulatory reporting requirements. Multiple iterations and validation features have been added over time to ensure timely data entry and data quality from both the field and office personnel. Come hear how Apache has successfully used these software platforms for the last two EPA Subpart W reporting cycles.

11:45 a.m. - 1:00 p.m.

## **Lunch Exhibit Hall - Galleria I, II, III**

1:00 - 2:00 p.m.

## **Is a Highly Customized EHS Data Management System Worth It? The Benefits and Drawbacks of One System vs. Multiple Solution Specific Systems** [San Felipe](#)

- **Allie Janoch**, CEO; Mapistry

Many industry experts advocate for broad EHS software systems, requiring intense customization and configuration to fit with a company's existing workflows and processes. What are the benefits and drawbacks of this strategy? Can solution specific systems can be combined to form a "best-in-class" EHS system? Can these narrow but focused software solutions provide expertise the broad systems cannot? Join the discussion to learn which solution might be best for you.

## **Aligning EHS Through Integrated Systems: Success Factors for System Excellence** [Tanglewood](#)

- **Sameer Vyas**, Partner; Huco Consulting

Though each organization is unique, many are subject to similar regulations and requirements, especially when they operate in the same geographical area or industry segment. So, do they need to be unique when managing their EHS responsibilities and risks? Come learn success factors and best practices that can streamline processes, how to avoid common pitfalls, the drivers of an integrated system and when an integrated system is most beneficial.

## **Demonstration of Dakota Software Corp. by Oil States International Inc.** [Bellaire, Post Oak](#)

- **Mark Yarmolich**, Director of Risk Management; Oil States International Inc.

This presentation will demonstrate how Oil States International, an oilfield services company and manufacturer of products for deepwater production facilities, utilizes Dakota Software's ProActivity Suite™ to manage EHS activities and reporting across their domestic and international locations. It will highlight how they expanded their incident reporting programs, streamlined their workers compensation claims processes, and are providing Risk Managers with visibility into their organizational Business Continuity program.

2:15 - 3:15 p.m.

## Using Technology to Bulletproof EHS Compliance Management [San Felipe](#)

- **Julian Moffatt**, Director of Environmental Solutions; VelocityEHS

As EHS regulations evolve, companies face a growing number of challenges. Perhaps the greatest obstacle to compliance is coordinating all of the monitoring, recordkeeping, communication and reporting required within a centralized, top-down management system. Without an effective way to schedule compliance tasks, track corrective actions and stay ahead of changing regulations, the risk of non-compliance is far too great. This session will discuss how software technologies can help strengthen your EHS compliance management program.

## Demonstration of Locus Platform by Grain Processing Corp. [Tanglewood](#)

- **Mick Durham**, Director of Environmental Services; Grain Processing Corp.

This presentation will demonstrate how companies can record and manage their environmental data for regulatory compliance and air quality monitoring using Locus Platform, a true multi-tenant SaaS specifically designed to be flexible, user-configurable, and scalable for the customer's evolving EMS business requirements. GPC has been using Locus Platform since 2015 to streamline their Environmental Compliance Log documentation and reporting process by making use of configurable data entry forms, automated e-mail notifications, analytics dashboards, and flexible data log revisions. By using the Locus Platform solution, GPC has been able to ensure compliance requirements are met, improve transparency and streamline effort spent on reporting data to regulatory agencies on a routine basis.

## Demonstration of Medgate by Toyota Motor Manufacturing Canada Inc. [Bellaire, Post Oak](#)

- **Adam Pearson**, Assistant Manager – Safety; Toyota Motor Manufacturing Canada Inc.

This presentation will show how Toyota uses Medgate's EHS platform to improve its operations. Specifically, the reporting and dashboard functionality is being used for tasks such as moving users through the existing processes, and the inspections process and findings and actions. Mr. Pearson will discuss how to approach team member training, subject matter expert support, and overall roll-out logistics.

3:15 - 4:00 p.m.

## Break [Exhibit Hall – Galleria I, II, III](#)

4:00 - 5:00 p.m.

## The Transformational Power of Emerging Technology: How Wearable Technology, Virtual Assistants, & Virtual Reality Will Change the World of Data Collection in EHS [Bellaire, Post Oak](#)

- **Donavan Hornsby**, Vice President & Corporate Strategy Executive; Gensuite LLC

There are few things that change as quickly as technology. What does the future of environmental, health, safety and sustainability programs, processes and performances look like as we enter the world of smart glasses, intelligent speaker systems, QR technologies, and virtual reality? Come learn practical examples of how EHS&S leaders are leveraging emerging technology to enhance EHS programs, the safety considerations involving increased technology in the workplace and the insights from a first-hand experience with integrating new technology with EMIS solutions.

## Using Big Data & Analytics to Predict and Prevent Incidents [San Felipe](#)

- **Harold Gubnitsky**, President and Chief Strategy Officer; ProcessMap Corp.

Today's EHS professionals are inundated with data from multiple sources, yet receive limited actionable insights. In this session, you will learn how an EHS function with limited resources can leverage the power of big data and analytics to make better decisions – proactively identifying risks and efficiently preventing incidents from occurring.

## March 7

- 4:00 - 5:00 p.m. **Demonstration of The Humantech System by Inteva Products** Tanglewood  
• **Rick Barker**, Corporate Ergonomics Specialist; Inteva Products

This presentation will highlight how Inteva Products, a Tier 1 automotive parts supplier, is implementing and managing a global ergonomics process across manufacturing plants in 14 countries using The Humantech System®. The software helped the company improve its workplace assessments and job improvements process and, as a result, decreased MSD risk and Workers' Compensation costs. Rick will explain how seven North American manufacturing sites completed 800 job assessments and identified over 750 improvement opportunities during the first implementation wave in the first year of use. He will also demonstrate how over 400 people completed ergonomics training using e-learning modules..

- 5:00 - 6:00 p.m. **Networking Reception** Exhibit Hall - Galleria I, II, III

Sponsored by:

## March 8

- 8:00 a.m. **Registration** Galleria Foyer

- 8:00 - 9:00 a.m. **Breakfast** Exhibit Hall - Galleria I, II, III

- 9:00 - 9:15 a.m. **Morning Announcements** Bellaire, Post Oak  
• **Carol Singer Neuvelt**, Executive Director; NAEM

- 9:15 - 10:15 a.m. **NAEM Research** Bellaire, Post Oak  
• **Taylor Gelsing**, Research Analyst; NAEM

What are software shoppers looking for in a new system? How much are they planning to spend? What is driving returning buyers back to the market? NAEM will answer these and other key questions in a presentation of highlights from its 2017 EHS & Sustainability Buyers Guide report. Come prepared to discuss the results and share your own experiences as you navigate the software marketplace.

- 10:15 - 10:45 a.m. **Break** Exhibit Hall - Galleria I, II, III

- 10:45 - 11:45 p.m. **Using Data Visualization to Improve your Balance Sheet** San Felipe  
• **Kristin Colberg**, Global Environmental Manager; H.B. Fuller Co.

Many companies spend time and money managing and utilizing traditional methods to collect and analyze data associated with legacy liability projects. Since many resources are expended, it is important that companies get the value out of this process. Now, EHS professionals are turning to data-visualization technology to leverage their data and improve their bottom line. Come learn how enhanced data visualization provides investment validation, more precision in strategy implementation and how information can be transformed into common stakeholder communication tools.

10:45 - 11:45 p.m. **Demonstration of Sustainability Intelligence by Masco Corp.** Tanglewood

- **Sara Osterman**, HSE Manager; Masco Corp.

Come learn how Masco rapidly deployed a cloud portal and business intelligence solution with Green Diamond's Quick Start for Sustainability Intelligence technology offering. Highlights include data management automation, analysis, reporting, and integrating standards like GRI and SASB. You will hear about lessons learned and what's next on the journey for delivering the right information at the right time, anytime and anywhere.

**Demonstration of ARTEMIS by Wawa Inc.** Bellaire, Post Oak

- **Joseph Standen**, Environmental, Utilities & Regulatory Services Manager; Wawa Inc.

This demonstration will showcase how Software as a Service (SaaS) solution can streamline and centralize your environmental program. From mobile data collection to real time reporting, we will show how information from various sources can be collected and reported using an intuitive interface. Walk through the easy-to-use mobile interface, how it synchronizes with the ARTEMIS interface; and additional tools such as, KPI roll ups, mapping, custom reporting and document management.

11:45 a.m. - 1:00 p.m. **Lunch** Exhibit Hall – Galleria I, II, III

1:00 - 2:00 p.m. **Business Processes for Keeping Your System Fresh** Bellaire, Post Oak

- **Sara Kitchens**, CSP, PMP, EHS MIS Program Manager; Google

You've gone through the process of selecting and implementing your new EHS software, so the project is complete, right? The world is not static so your EHS software configuration should not be either. This session explores how the hard work really begins after the deployment of a new EHS software and the importance of keeping your system relevant and fresh. Attendees can expect to learn best practices to maintain the value of their EHS software system and how to plan for continuous implementation.

**The Need for Collaboration in the Collection of Supply Chain Data: Human Connectivity and Advanced Technologies** San Felipe

- **Scott Kaufman**, Cofounder; PeerAspect

It's no secret that the need for supply chain data collection is growing tremendously. While technology certainly does have a large part to play, it is the relationships between people that often determines the success or failure of supply chain initiatives. This talk will explore how good old fashioned human connectivity is helped and hindered by proliferating technologies, and how this dynamic interplay might take shape in the future.

**Demonstration of Tableau Software Inc. by Dean Foods Co.** Tanglewood

- **Aubrey Cowart**, Senior Risk Analyst; Dean Foods Co.

This presentation will highlight how Dean Foods uses Tableau's data visualization tools to understand what information is hiding in the data and to make better decisions.

2:15 - 3:15 p.m. **Calculating and Verifying Historical Data From Legacy Systems** San Felipe

- **Scott Shaw**, Senior Environmental Specialist; Sasol North America Inc.
- **Craig Laskowski**, Project Manager, EHS Information Management; CH2M
- **Kevin McKee**, Senior Technical Consultant EHS Information Management; CH2M

Now that you've selected and implemented a new EHS software, can you be sure your metrics are being calculated correctly? The process of verifying calculations within a newly deployed information system is a critical component of both user adoption and the decommissioning of legacy systems. This session will discuss examples of data inconsistencies, key components, and best practices to ensure that EHS business process calculations are successfully transferred over to newly implemented EHS systems.

Environmental Resources Management (ERM) is a leading global provider of environmental, health, safety, risk, social consulting services and sustainability related services.

For over 20 years we have helped clients meet their Environmental, Health, Safety (EHS) information needs.

2:15 - 3:15 p.m.

## Demonstration of Perillon by National Grid plc [Tanglewood](#)

- **Michael Tucker**, Principal Program Manager; National Grid plc

National Grid implemented Perillon’s EHS Software solution to effectively measure, monitor, and analyze comprehensive environmental compliance across its North American operations to meet regulatory mandates and as part of an ISO 14001:2015 registered environmental management system. Come see how National Grid uses the mobile app, corrective action workflows and analytical tools to streamline periodic and scheduled assessments for a wide range of programs.

## Demonstration of cr360 by Biogen Inc. [Bellaire, Post Oak](#)

- **Kathleen Woodward**, Manager, EHS&S; Biogen Inc.

Biogen’s commitment to successfully managing their EHS&S functions required a system that supported their current framework. The cr360 platform allowed for a customizable software system that not only sustained but enhanced Biogen’s EHS&S initiatives. By utilizing custom modules Biogen has been able to tackle common challenges, increase focus on metrics and streamline data. Come hear Ms. Woodward’s lessons learned, successes and tips for your own software implementation experience.

## Break [Exhibit Hall – Galleria I, II, III](#)

4:00 - 5:00 p.m.

## How To Revive A Deployed Compliance Management System from the Brink of Disaster [San Felipe](#)

- **Phillip Wiedenfeld, PE**, Senior Advisor, Environmental Systems; Enbridge Energy Company Inc.

Maybe you have a system that has been remaining idle for a long period of time or your current system is on the verge of failing. If this sounds familiar, come to this session to learn how to manage and create communication channels early and often with all stakeholders, why establishing previous deployment disconnects early in the process will help the current initiative and why training bundled with live hands-on user acceptance testing is ideal.

## Leveraging Excel To Support Reporting and Task Management [Tanglewood](#)

- **Don Ahearn**, Director; xOverTime Inc.
- **David Hadzinsky**, Director, EHS; PCC Airfoils LLC

Everyone hears about “the cloud” and they often wonder, “What is the big deal?” or “How is it helping me?” And yet, Excel is everywhere in an EHS department. Even when enterprise systems are in place, Excel is still used for reporting and data manipulation outside the enterprise system. In this presentation attendees will learn how cloud technologies can support business users in a way that allows them to take familiarity and usability of Excel and deliver the power that typically they only received from an enterprise EMIS.

## Demonstration of ProcessMAP by Fiat Chrysler Automotive [Bellaire, Post Oak](#)

- **Greg Rose**, Director of EHS&S; Fiat Chrysler Automotive

A global leader in automobile manufacturing, Fiat Chrysler Automobiles (FCA) has a worldwide initiative to align EHS processes to support manufacturing excellence. In this session, you’ll discover how FCA developed a world-class health and safety and sustainability solution, SPARC, powered by ProcessMAP. This session will cover the alignment of priorities, processes, technologies to address the company’s strategic initiatives.

5:00 p.m.

## Conference Adjourns

# Full-Service Support for EHS Management Information Systems

From business case development and requirement/gap analysis to conceptual/detailed design and data collection to deployment, testing, training and post-implementation support.

AECOM provides the full range of environmental services to enrich and enhance our MIS deliverables.

## FOR MORE INFORMATION

**EVALUATE**  
Define your business & system requirements with the help of our MIS Requirements Library.

**IMPLEMENT**  
Meet your emerging market demands with forward-looking planning and execution of enterprise-wide implementations.

**INTERFACE**  
Enhance user productivity by integrating the application with business databases.

**REPORT**  
Design and build tailored reporting and dashboard systems that integrate with existing reporting software – for quick, cost-effective business enhancements.

**MANAGE CHANGE**  
Preserve a stable system while incorporating new features into the MIS configuration, facilitated by ongoing training for specific user access levels or groups.

## EHS, Sustainability, Quality...

all rely on information systems to improve performance and productivity, while saving money and reducing risk. At AECOM, we combine our core environment and safety business with deep information technology expertise to offer complete life-cycle support to our clients.

# 2017 CONFERENCES & EVENTS

## **EHS MANAGEMENT EXCELLENCE CONFERENCE**

May 17-18, 2017 | Baltimore, MD

The basis of an effective EHS program remains the strength of its management system and how thoroughly it is integrated into business practices. Focusing on the core of EHS responsibilities, this conference will bring together a diverse group of EHS professionals to discuss the most effective ways to ensure compliance, reduce risk and drive business results.

## **WOMEN'S LEADERSHIP CONFERENCE**

June 20-22, 2017 | Portland, OR

NAEM's Women's EHS & Sustainability Leadership Roundtable gives corporate EHS&S leaders the opportunity to connect, share and grow. Attendees will meet and network, hear practical and actionable insights from the foremost women in the field, and participate in an interactive idea exchange on current issues facing women in the EHS&S discipline.

## **SUSTAINABILITY MANAGEMENT CONFERENCE**

August 1-2, 2017 | Chicago, IL

Learn how to further integrate sustainability into your business operations from fellow corporate EHS and sustainability leaders. Through a mix of peer-led case studies and benchmarking dialogues, NAEM's annual sustainability conference is a unique opportunity to gain actionable insights you can use to immediately improve performance, identify opportunities for your business and set better sustainability goals.

## **EHS & SUSTAINABILITY MANAGEMENT FORUM**

October 25-27, 2017 | Fort Lauderdale, FL

NAEM's EHS Management Forum is the largest annual gathering for environment, health and safety (EHS) and sustainability decision-makers. Celebrating its 25th anniversary this year, NAEM's annual conference has been the premiere event dedicated to best practice-sharing for those developing and integrating strategic environmental, health and safety programs within companies. Join your peers from leading companies, get exposed to new ideas, and come away energized and ready to implement what you've learned.
