

Kristin Alstad Professional Bio

Kristin Alstad is Vice President of Sustainability & Government Solutions at Inmar Intelligence, where she leads enterprise sustainability strategy, environmental compliance, ESG governance, and commercialization initiatives across healthcare, government, retail, and commercial markets.

With more than 20 years of experience spanning regulatory compliance, reverse logistics, product lifecycle management, and environmental stewardship, Kristin specializes in translating complex regulatory requirements into scalable business systems that strengthen operational resilience and deliver measurable environmental value. She has led the development of enterprise ESG governance, customer-facing sustainability reporting capabilities, strategic partnerships, and innovative healthcare solutions that integrate sustainability into core business operations.

Kristin is recognized for building collaborative, cross-functional programs that connect sustainability with commercialization, regulatory compliance, and customer success while advancing responsible product lifecycle management across highly regulated industries.
