

Solution Center “Power Hour” in Engagement Hub

Wednesday, October 22, 10:00 - 11:00 AM

Thursday, October 23, 10:00 - 11:00 AM

Discover best-in-class solutions to common EHS and Sustainability/ ESG challenges from leading experts during this rapid-fire event. Each expert will address **a specific challenge** and share tools, strategies, and solutions that will help you advance your EHS, Sustainability and ESG programs. Attendees will rotate around the room every 10 minutes to hear a different expert’s presentation.

EHS COMPLIANCE & CONTINUOUS IMPROVEMENT

How to move from reporting risk to business value with assured sustainability data
Booth #220

How to navigate PFAS in due diligence, site characterization, remediation, landfills, and water treatment
Booth #217

How to cost-effectively leverage your company's budget for audits of waste & recycling facilities globally
Booth #204

How to anticipate and minimize compliance and reporting risks in a shifting regulatory landscape
Booth #208

How to streamline compliance with global, actionable EHS regulatory insights and updates
Booth #203

How to identify holistic & proactive strategies to position your EHS&S program for growth and optimization
Booth #205

How to improve compliance with quick checklists, audits, and program assessments
Booth #115

How to embed smart data into decisions to drive safety, sustainability, and market readiness
Booth #301

How to conquer global compliance by simplifying risk and regulatory change
Booth #206

How to eliminate permit compliance blind spots and slash analysis time from days to minutes with AI-powered permit analysis
Booth #209

How to leverage AI-powered insights to reduce risk and maximize efficiency
Booth #200

How to achieve wastewater compliance through waste stream characterization
Booth #107

How to achieve EHS&S performance excellence
Booth #305

How to navigate change when the EHS team shifts
Booth #308

How to collect data once and report to any local, state, or federal agency for EHS, ESG, or water programs
Booth #307

How to identify excellence in EHS partnerships - essential pillars for success
Booth #210

How to reimagine EHSS purpose and impact with Awareness-Based Risk Management (TM)
Booth #101

How to optimize EHS processes with AI and ERP integration for greater efficiency and compliance
Booth #304

How to take command of your waste program & withstand any audit
Booth #117

How to leverage the power of integrated chemical management to promote worker safety and drive compliance.
Booth #121

How to manage risks and minimize liabilities while responding to a catastrophic environmental emergency
Booth #216

How to integrate EMS into digital platforms for scalable EHS performance
Booth #318

SAFETY INNOVATIONS & BEST PRACTICES

How to cut risk and boost efficiency with purpose-built AI-driven insights
Booth #218

How to scale and standardize multi-site safety programs with AI-powered smart matching technology
Booth #303

How to look beyond compliance to engineer designs that use human and organizational performance principles
Booth #103

How to safely evacuate employees with Access and Functional Needs in an emergency
Booth #109

How to leverage AI to predict SIFs, automate RCA, and make Job Safety Analyses better, faster
Booth #100

How to accelerate adoption of Connected Worker Safety technology within an organized labor culture
Booth #316

How to go beyond incident management with a risk-oriented approach that proactively manages hazards
Booth #201

DIGITAL SYSTEMS, DATA, & REPORTING

How to anticipate, prioritize and resolve emerging EHS compliance and sustainability risks
Booth #207

How to streamline, manage, and report on your EHS, GHG, and ESG performance with real-time KPI tracking
Booth #302

How to eliminate EHS silos with a centralized command & use AI to empower frontline workers
Booth #211

How to transform sensor data into actionable environmental intelligence for EHS compliance and ESG impact
Booth #310

How to move from data fatigue to data empowerment
Booth #306

How to use AI at work: real time monitoring, smarter reporting, and better compliance
Booth #119

How to apply a Carfax lens to supplier data and transform lifecycle outcomes and procurement returns
Booth #111

DECARBONIZATION & SUSTAINABILITY IN PRACTICE

How to evaluate and mitigate climate risks using Property Resiliency Assessments (PRA)
Booth #221

How to streamline excess healthcare and life sciences inventory with compliant, sustainable solutions
Booth #320

How to break down silos with automated, connected product data
Booth #202

How to build a business case for sustainability that aligns EHS compliance, strategy, and reputation
Booth #106

How to leverage your current EHS systems to build a nature strategy and advance sustainability goals
Booth #219

How to utilize location and disposal technology to boost EHS efficiency and sustainability across all sites
Booth #105

How to quantify and track biodiversity performance across a company's portfolio using scalable metrics
Booth #300
